

# VOC Regulations for Architectural and Industrial Maintenance (AIM) Coatings and Adhesive and Sealants

AIM regulations limit the Volatile Organic Compound (VOC) content in products classified as Architectural Coatings. Currently regulations can be broken into six basic categories in North America:

- US EPA National AIM Rule
- Various state AIM Rules (CT, DE, IL, IN, ME, MD, MA, NH, NJ, NY, OH, PA, RI, Northern VA, & Washington DC)
- Canadian National AIM Rule
- California Air Resources Board (CARB 2000) AIM Suggested Control Measure
- California Air Resources Board (CARB 2007) AIM Suggested Control Measure
- California South Coast Air Quality Management District (SCAQMD)

Adhesives and sealants regulations limit VOC content under various state and local regulations. These include various California local air boards and CT, DE, GA, IL, IN, NC, NH, OH, ME, MD, NJ, NY, PA, RI, VA, and Washington DC. Currently there are no applicable Canadian adhesives and sealants VOC regulations.

These regulations apply to GCP Applied Technologies waterproofing, air barrier, adhesive primer and accessory products whose compliance status is shown in the table below:

Regulations include labeling requirements such as VOC content and date of manufacture. Please refer to product labels and consult regulations within your jurisdiction to determine if use/supply restrictions exist.

The information in this document is current as of 11/1/2013. Due to the dynamic nature of regulations, which include changes to the regulations themselves, and the states and local jurisdictions that adopt them, you should always consult requirements in your state and local jurisdiction to determine specific requirements.

Product Name	South Coast AQMD & CARB 2007	All Other U.S. and Canadian Areas
Bituthene® Mastic	Not Allowed	Allowed
Perm A Barrier® VP LT & VPO LT	Not Allowed	Allowed
All Other GCP Waterproofing, Air Barrier, Adhesive Primers and Accessory Products	Allowed	Allowed
